

M.HAMZA NOOR

ABOUT ME

Automation Engineer and Developer with hands-on experience building production-grade backend systems, including multi-tenant CRM synchronization engines and autonomous AI agents. Skilled in designing asynchronous data pipelines, processing complex JSON payloads, and developing scalable, low-maintenance operational workflows.

EDUCATION

2022–2024

Unique High School

Matric–Computer Science

2024–2026

Punjab Group Of College

Intermediate (ICS)

PROJECTS

1. Multi-Tenant CRM Sync Engine (GoHighLevel + n8n)

- Built a webhook router in n8n to sync contact data across multiple business tenants in real time
- Added deduplication logic to filter redundant payloads over a rolling 7-day window
- Wrote contact-matching and validation scripts (email + phone fallback) to keep tenant databases clean and accurate

2. AI-Driven Social Media & CRM Lead Funnel

- Built an automated sales funnel to handle lead intake across Instagram, TikTok, and Facebook
- Connected AI agents to a memory buffer to qualify leads by project scope and assign tracking IDs
- Created a one-click approval workflow that updates spreadsheets and sends confirmations automatically

PORTFOLIO

<https://hamza-systems.tech/>

git

<https://github.com/hamza19-2006>

SKILLS

Core Automation: n8n, Webhook Architecture, REST APIs, JSON Parsing, Data Syncing

CRMs & Tools: GoHighLevel, Meta Graph API, GitHub, Google Sheets

AI Integration: OpenAI API, Google Gemini, Custom LLM Routing

Languages & Scripting (Working Knowledge)

- **Dart** : mobile app development
- **JavaScript** : custom logic within n8n workflows
- **Python, HTML, CSS** : basic reading, debugging, and minor edits
