PROJECTS

1. Multi-Tenant CRM Sync & Deduplication Engine (n8n + GoHighLevel)

- Built a multi-tenant webhook router in n8n to sync leads across agency sub-accounts in real time.
- Implemented smart deduplication to filter duplicate inquiries and prevent database clutter.
- Automated pipeline stage updates and contact mapping via fallback matching logic.

2. Autonomous AI Social Lead Capture Funnel (n8n + Gemini)

- Automated direct message and comment ingestion across Instagram, TikTok, and Facebook.
- Integrated AI to qualify project scope, collect client details, and generate structured lead briefs.
- Built a one-click manager approval email system that automatically logs leads to Google Sheets.

3. Brutl Fitness (Flutter Mobile App — Live on Play Store)

- Developed a high-performance cross-platform fitness app in Flutter with offline logging, workout split planners, and cloud sync.
- Built custom macro analytics and daily consistency algorithms to track calorie intake and workout volume.
- Engineered gamified community leaderboards and streak badges, achieving a 4.9★ rating on Google Play.
